

HUSEYN CAVID

Lead Document Controller | EDMS Specialist | Workflow Automation

+994 99 344 2414 • huseyn.cavid.dev@gmail.com • linkedin.com/in/huseyncavid • huseynjavid.com • Baku, Azerbaijan

PROFESSIONAL SUMMARY

Results-driven Lead Document Controller with 4+ years of experience managing complex document ecosystems on large-scale international engineering and construction projects. Expert in EDMS administration, FIDIC-based document workflows, MDR governance, and cross-disciplinary coordination across 20+ subcontractors. Unique advantage: hands-on automation skills (PowerShell, Python) that have reduced manual processing time by 60%+, combined with deep IT infrastructure experience. Currently driving document control excellence at Wood Energy Group.

PROFESSIONAL EXPERIENCE

Lead Document Controller

March 2026 – Present

Wood Energy Group | Baku, Azerbaijan

- Acting as the central document control interface between Client and Contractor organisations, managing all formal technical correspondence and ensuring full traceability of document exchanges.
- Reviewing, validating, and processing all incoming Contractor submittals against project document control procedures, contractual requirements, and applicable engineering standards prior to Client distribution.
- Governing transmittal workflows end-to-end — verifying completeness, enforcing submission protocols, and maintaining auditable records of all document movements across project parties.
- Monitoring and controlling document review cycles, tracking response deadlines, and escalating overdue actions to ensure zero impact on project schedule.
- Maintaining the Master Document Register (MDR) with accurate revision status, review codes, and submission history across all engineering disciplines.
- Ensuring strict compliance with document numbering conventions, metadata standards, and revision control protocols on all documents entering and leaving the project EDMS.

Document Control Lead

June 2024 – February 2026

KOLIN Construction • kolin.com.tr | Sitalchay, Azerbaijan

- Architected and managed the complete document lifecycle (creation, review, approval, distribution, archiving) in line with project procedures and FIDIC-based requirements.
- Directed full control over all outgoing and incoming documentation (TRN, LET, STQ, MAR, MIR, ITP, SHD, MOM, DR, NCR), ensuring zero errors and full traceability.
- Led MDR governance, enforcing strict numbering, revision, and metadata protocols across all disciplines.
- Designed and implemented structured server architecture optimising document flow across 5+ engineering disciplines and 20+ subcontractors.
- Developed and deployed automation tools (PowerShell/Python) to streamline filing, naming, routing, and archiving — reducing manual processing time by over 60%.
- Coordinated seamless document submissions between the Contractor, Engineer (Proyapi), and Employer (STP) via EDMS and automated Outlook workflows.
- Performed high-precision QA/QC validation prior to official issuance, including formatting, signatures, metadata, and drawing link checks.
- Monitored approval cycles, outstanding actions, deadlines, and comment resolutions; prepared weekly executive-level status reports.
- Strengthened cross-disciplinary coordination across civil, mechanical, electrical, fit-out, HSE, QC, and procurement teams.

Document Controller

April 2021 – June 2024

KOLIN Construction • kolin.com.tr | Kalbajar, Azerbaijan

- Controlled all incoming/outgoing project documentation across civil, mechanical, electrical, and other engineering disciplines.
- Registered, verified, formatted, and prepared documents prior to official issuance; maintained MDR with continuous revision integrity.
- Managed technical submissions including MAR, MES, and other project deliverables; ensured proper routing and distribution to stakeholders.
- Monitored EDMS workflows and email-based routing systems; submitted documents for approval and tracked review outcomes.
- Implemented consistent digital and physical storage structures, ensuring full compliance with document numbering, revision control, and metadata rules.

IT Specialist

June 2018 – February 2021

Clopos POS • clopos.com | Baku, Azerbaijan

- Provided technical support for POS system operations across multiple restaurant and hospitality clients.
- Installed and configured servers, networks, routers, switches, and UniFi access points; troubleshoot connectivity issues.
- Maintained and repaired hardware systems (SSD, HDD, RAM, CPU); performed OS installation, printer configuration, and general IT support.
- Integrated diverse hardware devices into the Clopos POS ecosystem, ensuring compatibility and uninterrupted operations.

CORE COMPETENCIES & TECHNICAL SKILLS

EDMS & Platforms: Internal EDMS (Wood), Aconex (KOLIN), SharePoint, custom EDMS solutions, FIDIC-based workflow management

Document Control: MDR governance, transmittal management, revision control, QA/QC validation, lifecycle management

Automation & Dev: PowerShell scripting, Python, workflow automation, n8n, Excel (advanced), VBA

IT Infrastructure: Server configuration, network setup, UniFi, OS administration, hardware maintenance

Soft Skills: Cross-functional coordination, stakeholder communication, executive reporting, team leadership

EDUCATION

Master of Business Administration – Hotel Management

September 2021 – June 2023

Baku State University | Baku, Azerbaijan

Bachelor of Business Management

September 2017 – June 2021

Baku State University | Baku, Azerbaijan
